Nature always has the upper hand. You aren’t as fast as the animals, and you can’t see as far and clear as they do. The animal smells you and hears you before you even know they’re there.

You have to learn their ways. You have to outthink the animal you’re hunting by knowing where they come from and anticipate where they are going.

You can do everything right and still fail. Even the best hunter can end up empty-handed.

But you’re the hunter. There’s something you can do. You can never give up.

Those who succeed, never turn back. You can keep going. You can create the right place and the right time.

Because you know what every Tikka shooter knows: That you can trust your rifle. You can be confident it will handle the same forces that you can.

Whatever the situation or circumstance, all you have to do is concentrate on your shot.

Your Tikka rifle is the ultimate tool for accuracy. Tikka is second to none.
The year 2018 was big for us. We released a long waited addition to our product family, rimfire rifle Tikka T1x and the reception was amazing.

As usual, we aimed high and Tikka T1x was designed with the same uncompromising craftsmanship that defines all of our products: stainless steel bolt, high quality trigger unit previously limited to Tikka centerfire rifles and compatibility with most T3x accessories. Based on the feedback, we hit the mark once again. This year we are releasing a much demanded left handed version.

As always, we continue to listen our customers and work tirelessly to ensure that we can always offer best-in-class value for every sport shooter and hunter.

Welcome to the world of Tikka!
Experience the rimfire rifle that performs perfectly at the range and in the rough.

TIKKA T1x MULTI TASK RIMFIRE

SAFETY
A two-stage safety that’s easy and quiet to operate and clearly indicates when the rifle is on safe or ready to fire.

TRIGGER
The mechanism shares the same high quality trigger unit offered in Tikka centerfire rifles for achieving maximum accuracy.

BOLT
Tikka T1x has a stainless steel bolt, which offers smooth and weather resistant movement.

PISTOL GRIP
Compatibility with most T3x accessories makes it easy to adapt the rifle to the preferences of any shooter.

BARREL
A cold hammer forged barrel with a crossover profile offers the benefits of a heavier barrel without much added weight.

STOCK
Light and durable stock with carefully designed grip patterns for maximum comfort. From a vertical pistol grip to colored grips, the T1x stock can be fitted with most T3x accessories. The length of the stock can be increased with spacers. This allows the rifle to grow alongside the shooter.

MAGAZINE
A 10 round magazine comes as standard for both .22 LR and .17 HMR calibers.

ACTION
The action shares the same bedding surfaces and inlay footprint with the centerfire T3x rifles.

SIGHT ATTACHMENT
Numerous targets, one solution action

NUMEROUS TARGETS, ONE SOLUTION

Experience the rimfire rifle that performs perfectly at the range and in the rough.
Experience the most versatile rimfire rifle on the market.

Tikka T1x rimfire rifle has been designed from the ground up to handle a variety of shooting tasks. Its barrel has a cross-over profile, so you can enjoy the benefits and stability of a heavier barrel without noticeably increasing the weight.

The ample 10 round magazine and an exceptionally high quality trigger mechanism make each shot count, whether you are at the range or exploring the great outdoors.

Caliber options: 22 LR, 17 HMR

Choose a rifle that is up for the task. 22 LR and 17 HMR caliber options of Tikka T1x are best suited for target shooting and small game hunting.

TIKKA T3x SERIES

THE ULTIMATE TOOL FOR ACCURACY

SAFETY
Tikka rifles provide you with a two-stage safety, blocking both the trigger and bolt handle. The safety is easy to operate and indicates when the rifle is ready for firing.

ACTION
The action is designed for accuracy, reliability and easy servicing. Tikka rifles provide you with an extremely rigid action with a two-locking lug T3 bolt. The bolt features a spring-loaded plunger ejector and a removable bolt handle, with a 70° opening angle leaving plenty of room for handling the bolt. This is one of the smoothest actions on the market.

TRIGGER
A single-stage pull with a comfortable trigger feel. The steel trigger has vertical grooves for added grip, even when wearing gloves. It is easily adjustable through the magazine well from 1 to 2 kg (2 to 4 lbs).

SIGHTS
Most rifles are delivered without open sights; they are optional. Integral rails are installed on top of the receiver for Tikka’s unique Optilock™ scope mounts. The receiver is also tapped for a Picatinny scope mount base.

MAGAZINE
The single-column detachable magazines are manufactured from strong fiberglass-reinforced synthetic material. The magazine holds 5, 5 or 6 rounds depending on the model and caliber. A flush release is installed at the front of the magazine to prevent accidental releases.

BARREL
A cold hammer-forged Sako barrel of highest-grade steel is fastened to the receiver by a sturdy thread for safety and accuracy. Barrel is hand-crowned, as a precise and even muzzle crown is essential for accuracy.

The Tikka T3x contains the same features that have made all Tikka rifles world-famous. When you have a Tikka rifle, you know it is second to none.
TIKKA T3x SERIES

THE BEST OF EVOLUTION

Features and improvements – you wished, we listened.

IMPROVED GRIP

A grip that never slips. The T3x synthetic stock has an asymmetrical grip pattern and shape that has been specifically designed to give a solid grip in all conditions.

IMPROVED RAIL ATTACHMENT

Always keep the target in your sight. The T3x models have extra screw placements on top of the receiver so that you can robustly attach a Picatinny rail – even when using larger scopes.

RECOIL PAD

T3x models come with an improved recoil pad technology that reduces the impact of recoil on the shooter. The recoil pad allows you to fully concentrate on the accuracy of your shots.

IMPROVED BOLT SHROUD

Robustness and quality go hand in hand. Our T3x models come with a durable metallic bolt shroud that covers and shields the rear of the bolt body and the firing pin.

REDESIGNED EJECTION PORT

The T3x receiver introduces a widened angular ejection port that makes it easier to feed one cartridge at a time.

STOCK NOISE REDUCTION

Be as silent as the forest. T3x synthetic stocks have a foam insert within the interior of the rear stock. This lowers the stock-generated noise and can help you keep your target in sight. Not available for models with an adjustable cheek piece.

MODULAR STOCK

T3x has a modular synthetic stock that has interchangeable pistol grips making it possible to modify the angle of the grip. The allows for multiple shooting positions. Additional grips are sold separately.

IMPROVED GRIP

The T3x synthetic stock also has an additional attachment point which allows you to change the width of the stock’s fore-end.

IMPROVED GRIP

The T3x has a modular synthetic stock that has interchangeable pistol grips making it possible to modify the angle of the grip. The allows for multiple shooting positions. Additional grips are sold separately.
The Tikka T3x Hunter is designed for the shooter who appreciates the warm feel of a wooden stock combined with solid performance.

The T3x Hunter offers an extensive caliber selection for hunting and sport shooting purposes. It is built with traditional principles and modern innovation, providing you with a new level of accuracy, reliability, and enjoyment.

**T3x Laminated Stainless**

Weather can change in minutes, but the accuracy and performance of this rifle lasts for years.

Tikka T3x laminated stainless is a weather-resistant, sharp-looking grey stock for the adventurous hunter. T3x Laminated Stainless is designed to withstand demanding weather conditions.

T3x Laminated Stainless model comes with a stainless steel barreled action and hard-laminated stock. Compared to normal wood, the laminated wood cell structure does not expand during changing weather conditions. This will minimize the change in point of impact from where the rifle was zeroed.

**T3x COMPACT**

A rifle that fits like a glove.

T3x Compact is an adjustable rifle that adapts to its user. This rifle has a 12.5” length of pull, creating ideal ergonomics for shooters who struggle with long stocks. It is suitable for long term use, as you can adjust the length of pull according to your needs – making it especially useful for young shooters, who can adjust it as they grow.

The calibers chosen are milder in recoil, easy to control and therefore great for training as well as serious hunting.

Caliber options: 204 Ruger | 223 Rem | 22-250 Rem | 243 Win | 7mm-08 Rem | 308 Win | 6.5 Creedmoor

Tikka T3x Compact comes with a 30 mm (approx. 1”) spacer and larger recoil pad to enable a longer length of pull.

**T3x ARCTIC**

The rifle that Canadian Rangers trust

When Canadian Rangers special forces were choosing their new rifle, the T3x Arctic beat all of its rivals. Canadian Rangers operate in some of the harshest conditions in the most remote areas of the world and they chose the T3x because it combines second to none weather resistance and performance.

Caliber options: 308 Win | 6.5 Creedmoor
T3x BATTUE

The short-barreled Tikka T3x Battue is designed specifically for fast target acquisition situations. The perfectly balanced and highly visible battue sights with TruGlo® optic fibers enable fast and easy aiming. With the addition of a rifle scope and OptiLock™ scope mounts, the T3x Battue has the accuracy to reach game at longer distances.

You can never be as fast as the animals, but with the right tool you’ll have the upper hand.

You can never be as fast as the animals, but with the right tool you’ll have the upper hand.

The Tikka T3x Battue rifles are built for hunting situations where the game is running or in motion, enabling easy targeting over relatively short distances. The T3x Battue is the top choice for hunters who trek and hunt in heavy-cover territories.

You can never be as fast as the animals, but with the right tool you’ll have the upper hand.

The fiberglass-reinforced modular T3x stock makes the rifle more lightweight and adds the possibility to modify the rifle for different situations.

T3x BATTUE LITE

You can never be as fast as the animals, but with the right tool you’ll have the upper hand.

The Tikka T3x Battue Lite shares the same special features as the Battue model.

The short-barreled Tikka T3x Battue is designed specifically for fast target acquisition situations. The perfectly balanced and highly visible battue sights with TruGlo® optic fibers enable fast and easy aiming. With the addition of a rifle scope and OptiLock™ scope mounts, the T3x Battue has the accuracy to reach game at longer distances.

The fiber-glass-reinforced modular T3x stock makes the rifle more lightweight and adds the possibility to modify the rifle for different situations.
SET TO BEAT THE WEATHER

No snow or ice, no mud or rain, no gravel or dust – nothing can prevent you from successfully hitting the target. Your Tikka rifle has the same pinpoint accuracy and performance in all conditions, anywhere in the world.
The classic T3x Varmint. Also available as left-handed.

A barrel and action made of stainless steel with a satin matte finish. Also available as left-handed.

If you’re looking for a true stalking or long distance tool, look no further.

T3x Varmint has consistent accuracy, be it at the range or on the plains. The free-floating barrel of the Tåkla T3x Varmint effectively eliminates vibration, offering solid accuracy performance round after round. The synthetic T3x Varmint stock comes with a vertical pistol grip, better suited for prone shooting.

The stock has an extra wide fore-end for more solid support, and the swivel stud accommodates either a bipod or a sling. The ergonomically designed Varmint cheek piece provides a comfortable optimal head position.

All Varmint models come with the standard of a 5- or 6-round magazine.

T3x TAC

T3x TAC is the ultimate choice for hunters who need a rifle that can handle the same forces that they can.

Compact size, Picatinny rail, vertical grip, wide fore-end, Teflon® bolt and 20” semi-heavy barrel contour make this a reliable precision tool in all circumstances. The T3x TAC rifle is in a class of its own. This rifle has a free-floating matchgrade barrel, and phosphate coating on both the barrel and action give this rifle lasting protection against external conditions. The M18x1 muzzle threading enables you to attach an accessory muzzle break or suppressors.

The Optilock™ mounts keep the scope aligned and secured during all circumstances. The scope is mounted with the revolutionary ball-bearing rings. Unlike conventional mounts, the Optilock’s polymer rings evenly distribute the clamping force along the shaft of the scope, protecting your optics. The limiter pin in the mount base and the limiter pin slot on the receiver enable fast, secure and accurate mounting of the scope.

Optilock bases and rings are machined from a solid block of steel creating a high strength and dimensionally accurate product.

**THE OPTILOCK™ IDEA**

- The rings are made of steel and have concave inner surfaces.
- Copolymer rings surround the scope tube and evenly distribute the clamping force.
- Four special screws evenly support the upper ring unit.
- Steel rings are fastened to the base from below.
- The front base of the Optilock™ has a limiter pin for the receiver’s surface in front. This ensures correct remounting of the scope and Optilock™ unit, without requiring new sight adjustments if the unit is removed and repositioned.
- The Optilock™ mounts keep the scope aligned and secured during all circumstances.
